PROFILE

Innovative tech leader and founder of Spacie, recognized for enhancing community engagement at Discord through AI and automation. Proven expertise in Python and team leadership, driving the development of cutting-edge solutions that propel product success. A strategic thinker skilled in navigating both technical and creative challenges, consistently transforming obstacles into scalable achievements.

WORK EXPERIENCE

- PYTHON
- TKINTER USER INTERFACE DESIGN
- DISCORD.PY DEVELOPMENT
- AUTOMATION
- AI & NLP (NATURAL LANGUAGE PROCESSING)
- BOT DEVELOPMENT
- VOIP SOLUTIONS
- SERVER MANAGEMENT
- CLOUD-BASED SOLUTIONS

Founder & CEO – Spacie (formerly Lunity)
June 2023 - Present

- Built Flake, the first AI-powered Discord bot for Egyptian Arabic, enhancing user engagement.
- Developed Lunex, a VoIP routing service that optimized voice chat quality in Egypt by rerouting traffic through international servers.
- Led a team of developers, designers, and content creators, managing end-to-end product development.
- Designed scalable server architectures for real-time applications.

Python Developer & Automation Specialist – Discord
June 2021- 2023

- Developed Python-based automation tools & bots for community management & business solutions.
- Built multi-threaded & network-based applications, optimizing server performance and automation workflows.
- Integrated API-based solutions to enhance system efficiency.

LANGUAGES

- Arabic - Native
- English - B1

AWARDS & CERTIFICATIONS

- Founded and scaled Spacie (Lunity) into a functional tech startup
- Developed Egypt's first AI-powered Arabic Discord bot (Flake)
- Built a VoIP optimization service (Lunex) improving voice communication in Egypt
- Led a team of developers & designers in launching multiple projects

WEBSITES, PORTFOLIOS, PROFILES

- Social Media: @abdvlrqhman

- Linkedin: linkedin.com/in/abdulrahman-ali-785b3631b

Graphic Designer & Video Editor – Freelance
sep 2021- 2022

- Designed branding & marketing materials for clients across various industries.
- Edited high-quality video content & motion graphics for social media & storytelling.
- Created custom animations & engaging visual content.

IT & Network Administrator
June 2023- Present

- Designed and maintained VoIP and cloud-based servers, optimizing latency and connection stability.
- Developed secure and scalable server architectures for hosting Discord bots and AI-based applications.
- Managed cloud services & networking solutions to enhance real-time application performance.
- Configured firewalls, security protocols, and network optimizations to support high-traffic applications.

AI & NLP Developer
June 2023- 2024

- Developed AI-powered chatbots with Natural Language Processing (NLP) for automated interactions.
- Built text-processing AI models trained in Egyptian Arabic, improving language understanding in automation.
- Integrated machine learning algorithms to enhance user interactions and automated responses.
- Designed and implemented sentiment analysis tools for social media and chatbot applications.
